

Data Declaration

Table 38

Arrests, by Age, 2006

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comments

- This table provides the number arrests nationwide in 2006 for the 29 offenses for which the UCR Program collects arrest data. These data are broken down by age of the arrestee and include the percent distribution of arrests by offense type.
- These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.

Methodology

The data used in creating this table were from all law enforcement agencies submitting 12 months of arrest data for 2006.

Population estimation

The FBI calculated 2006 state growth rates using revised 2005 state/national population estimates and 2006 provisional state/national population estimates provided by the U.S. Census Bureau. The FBI then estimated population figures for the Nation by applying the 2006 state growth rate to the updated 2005 U.S. Census Bureau data.
