

Data Declaration

Table 54

Arrests, Metropolitan Counties, by Sex, 2006

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comments

- This table provides the number of males and females arrested in metropolitan counties in 2006. The table furnishes breakdowns of these data for each offense and supplies a percent distribution of males and females arrested among all offense types.
- The *Metropolitan Counties* classification encompasses jurisdictions covered by noncity law enforcement agencies located within currently designated Metropolitan Statistical Areas. (See Area Definitions.)
- These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.

Methodology

The data used in creating this table were from all metropolitan county law enforcement agencies submitting 12 months of arrest data for 2006.

Population estimation

The FBI calculated 2006 state growth rates using revised 2005 state/national population estimates and 2006 provisional state/national population estimates provided by the U.S. Census Bureau. The FBI then estimated population figures for counties by applying the 2006 state growth rate to the updated 2005 U.S. Census Bureau data.
