

Data Declaration

Table 24

Property Stolen and Recovered

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comments

- This table provides property types, the reported value of stolen property, and the value of recovered property. The table also lists the percentage of recovered value of each property type.
- This table furnishes the number of law enforcement agencies that supplied supplemental data and the population represented by those agencies.

Methodology

The data used in creating this table were from all law enforcement agencies submitting at least 6 months of complete information regarding the monetary value of property stolen and recovered.

Population estimation

For the 2007 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2000 decennial population counts and 2001 through 2006 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2006 Census population estimate to derive the agency's 2007 population estimate.
