

Data Declaration

Table 40

Arrests, Females, by Age, 2009

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comments

- This table provides the number of females arrested nationwide in 2009. These data are broken down by age of the arrestee and include the percent distribution of arrests by offense type.
- The UCR Program collects arrest data for 29 offenses.
- These data represent the number of females arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same female.

Methodology

The data used in creating this table were from all law enforcement agencies submitting 12 months of arrest data for 2009.

Population estimation

For the 2009 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2000 decennial population counts and 2001 through 2008 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2008 Census population estimate to derive the agency's 2009 population estimate.
