

## Data Declaration

**Table 71**

**Full-time Law Enforcement Officers by Geographic Region and Division by Population Group, Number and Rate per 1,000 Inhabitants, 2007**

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

### General comments

- This table provides the number and rate of sworn law enforcement officers broken down by geographic region, division, and population group.
- For the data presentation in this table, the totals for full-time law enforcement officers in metropolitan and nonmetropolitan counties are combined.
- Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area.

### Methodology

- The information in this table is derived from law enforcement officer counts (as of October 31, 2007) submitted by participating agencies.
- The UCR Program defines law enforcement officers as individuals who ordinarily carry a firearm and a badge, have full arrest powers, and are paid from governmental funds set aside specifically to pay sworn law enforcement.

### Regions and divisions

The U.S. Census Bureau has established the four regions of the United States along with nine subdivisions that the UCR Program uses to compile the Nation's crime data. The

following table lists the 50 states and the District of Columbia arranged according to the regions and divisions of the United States.

### **Population estimation**

For the 2007 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2000 decennial population counts and 2001 through 2006 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2006 Census population estimate to derive the agency's 2007 population estimate.
